

Periodic Table Review

Using Spheros to Review for Assessments

Ready to change up how you review material with your students before a quiz or test? Use Spheros! The ideas below are for reviewing the Periodic Table, but any review session in any class can be designed to use Spheros.

Ideas:

Give students a mystery element (ex: just the atomic number, the abbreviation, etc) and the students can quickly program the Sphero to display the answer in the LED board (best suited to numbers, perhaps element abbreviations).

Give students a mystery element or definition and the students can drive their Sphero to the correct element (or column, row, or other area of the table) using our large periodic table posters.

Give the students a mystery element or definition, and the students can use the DRAW program to make the Sphero write out their answer with its motion.

Got your own idea? Let us know and we will help you figure out the best way to implement it!
